

# 3 Myths

## A Resource Guide

By: [DefendYourOnlinePrivacy.com](http://DefendYourOnlinePrivacy.com)

# Incognito Browsers

- Great for hiding things from people who use your computer
  - Christmas shopping for spouse
- Private/incognito browsers just prevent other people in your house from seeing your activity
- Still leak location and IP address
- Private browsing still allows for cookies and persistent storage within your browser
- Doesn't block trackers, and with the cookies, can still track your movements around the web

# Tools

- Tor Browser:
